New era of disasters

Australian communities are facing future disasters that are more frequent, more destructive, and more impactful.

Communities are relying on Councils to be resilient and ready for these future events.

Lead your local resilience

Building community resilience starts with Council leading by example.

The Resilient Ready Reset process helps identify practical recommendations to be activated by your people, to benefit your community.

More than business continuity

Resilient Ready Reset puts resilience at the centre of your Council agenda. We bring your leadership team together to identify capabilities, gaps and opportunities.

Our strategic focus on Prevent, Prepare, Promote and Protect, will empower all business units to build understanding and make a commitment to resilience.

Aligned with ISO Standards, AIDR Handbooks and global UNDRR and SDGs we embed resilience in your people.

3-step process

Completed within four weeks.

- 1 1.5-hour **Reset Audit Workshop** to assess high-level capabilities, gaps and opportunities
- 2 Receive your **Reset Report** with tailored recommendations and a roadmap
- 3 1-hour **Reset Roadmap Workshop** to plan your activation towards everyday resilience

Workshops are available online or onsite.

“Let’s make resilience everyone’s business in Council.”

Renae Harvin, Founder + Director at Resilient Ready
