

Biz Community Toolkit

Get every business in your community ready for future disasters

The Biz Community Toolkit program is an innovative solution focused on building resilience in all types of organisations within every community.

How does it work?

Tailored program

We help you select the best structure for your business community's needs from our 30+ modules – anything from a week to a month or a year.

Localised content

We co-design module content with a local steering committee to be relevant and helpful, and we film local business case studies for all modules.

Data & Workshops

We share all data collected to help reduce local vulnerabilities across the business community, and we deliver in-person or online workshops.

What are the benefits?

The Biz Community Toolkit program can benefit every operating business within a community (including not-for-profits).

- ◆ Building vital capabilities in preparedness and resilience
- ◆ Reducing local vulnerabilities including supply chains
- ◆ Strengthening business community connections and networks
- ◆ Activating our 80/20 disaster preparedness business culture
